

Completamiento de Pozos

Acerca

Una de las principales actividades de D&C Energy, Es el diseño, suministro y servicios en equipo de completamiento de pozos, térmicos y convencionales.

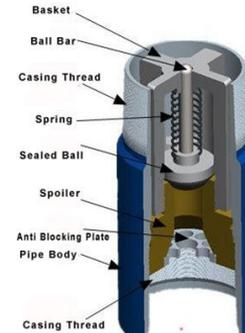

Hemos fabricados una serie de equipos de completamiento (Empacaduras, Camisas, etc.) para clientes según sus necesidades.

Completamiento

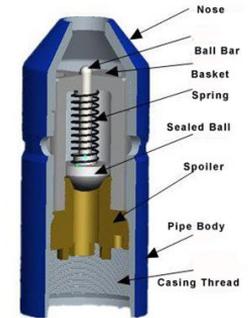

- Centralizadores
- Float Shoe
- Float Collars
- Stop Collars.
- Plug Bottom

Thermal Vacuum insulated Tubings (VIT)

Vacuum Insulated Tubing (VIT) Es una tubería compuesta de 2 tubos aislados con un material térmico que permite la concentración de temperatura para permitir una mejor producción.

La función principal de la utilización de este tipo de tubería de producción en completamientos térmicos es elevar el API del crudo, lo cual ayuda a su movilización.

Contamos con tuberías de 2 7/8", 3 1/2" y 4 1/2"
